The Flugnoids

Some people don't have to contend with the harsh realities of living an ordinary life. They live in a bubble and usually live a dull life and end up dull because of it. This continued process through out their entire life is something that they never recognize in themselves but usually see it and find it in others. Usually people they don't like or agree with.

The Flugnoids are a collection of People who connect and operate together in the ordinary world and who avoid such people and their activities like the Plague. And with what the entire world is going through now in 2020 with COVID 19 it may not be a bad idea to pause and get ready and be prepared to adjust to the real possibilities and opportunities that should be coming our way as the rational portion of Humanity.

Since most people exist in a world consumed and driven by anticipated gratification the Flugnoids incorporate this defect as something to keep an eye on early in their study of human nature. They take a different approach that helps them transcend the limited range of thinking that holds back other people. It has been said from the beginning of this underground movement that began in nineteen seventy seven in Lowell Massachusetts on Appleton Street and the downtown area.

A Flugnoid is a person or any entity that is totally content with what it has in life which includes achievements good,bad or even ugly if that be the case. This includes what they have done,who they have helped,behavior that was happily avoided or not even recognized and was helpful in inspiring and upgrading motivation and results in the future for itself or their self. the collective was growing and evolving in other parts of the city. and for years during its influence and its life time,

this group of citizens and sometimes regular visitors continuously kept an eye on the well being of anything happening inside the city.

There were nothing of what you would consider rules only guidelines that everyone seemed to follow and integrate into their lives and into the community . The first most noticeable guideline within its culture and activities was to not take their life experiences or whatever happened to them as either as a curse or a blessing but always as a challenge as an adventure and a journey without making judgments or having regrets or as it was often heard said: shit happens but you don't have to eat it.Just notice people who seem to have a piece of shit in their mouth and they don't know if they should swallow it or spit it out and just keep chewing on it and letting it dominate their mood and probably have residual leftovers embedded in their being for years to come.

Other people who are trapped in a world of empty results and unfulfilled hopes usually end up what are called Monkey People. It must be mentioned in all due fairness to the monkeys and of course all apes that The Flugnoids don't consider monkeys as an inferior species.
In fact its the opposite. Whenever the word Monkey People is said it is usually followed by someone saying: And the monkeys have done nothing to be so insulted or What have the monkeys done to be insulted. The Flugnoids recognize different groups and societies that hinder the development of the human race.
One is called Lep or l e p which stands for Lest Enthusiasm Possible. A wise Flugnoid once said Dull People decide to be Dull. Either from laziness,lack of motivation or maybe just weak or diluted genes. Its a good idea to keep in mind that Genes load the gun but Environment pulls the trigger. A favorite guideline of the Flugnoids is to avoid people who are so self-involved to the extent that they contaminate their surroundings and the people around them.

People usually just skim the surface of living and life. Its alright and okay to be in a state of deep distracted involvement as long as its moving your opportunities and your interests and your life and being forward.

Flugnoids : Having the ability and need to absorb energy from people and all organic and sometimes inorganic life. Usually creative in nature that could include a skill,an ability,or an attitude.

Note: It usually takes repeated contact before anyone is accepted for an interview and a study program is approved.
